Virginia, when her school was out of power felt rebellious, and passed the resolutions of 1798, which didn't mean secession or rebellion exactly, but had a strong squinting that way. Where have the senses of Congressmen gone that they don't realize the terrible burdens that rest upon the people and the fearful dangers that confront the Government? Do they call themselves loyal men, and yet play these fantastic tricks? By their default, the prices of everything that sustains life are rapidly mounting. SPICY-WHAT A BOSTON GIRL WANTS -The editress of the Boston Olive Branch, having received a communication from Nashville, Tenn., inquiring whether some female printers could be obtained there togo to Nashville, replied as follows: Every girl in Boston who is old enough to

work in a printing office, or any other office, has a lover, whom she would be just as likely to trade off for a Tennessee article as she would to swap him for a grizzly bear. The idea of a cream, rides in the omnibus, wears satin slip pers, and sometimes kisses the editor, going to Tennessee, except she goes as the wife of one of your first citizens (editors excepted), is truly ridiculous. Would not a girl in a nice siil dress, pantalettes and shiny gaiter be in one corner of the room two old darkies are jerking away at a Ramage press, and in the other the editor squirting tobacco juice all over the floor? Wouldn't she be in a nice fix when the editor and some great brute of a fellow, whom he had offended, got to playing at the game of shooting their revolvers across the office at each other's head? Who would her dark nights? Who would take her out to ride on Saturday afternoons, and go to church with her on Sunday? No, sir, a Boston girl would not go to Tennessee for love or money. She can get enough of both nearer home.

company with the Superintendent and one of from the house. the Trustees, we spent a portion of an afternoon, last week, in this school.

In the Male Primary Department the boys of one of the classes exhibited a good degree of proficiency in adding columns of figures upon the blackboard. Recess occurring soon after we entered, we left and visited the Female Secondary Department.

We heard classes read in Goodrich's Fifth and Third Readers. There was a distinctness of enunciation, a well-placed emphasis, and a freedom from the usual tone and rapid manner of school reading, not often found among pupils of their age. We cheerfully praise them for their manner of reading that difficult piece, 'The Poor Man's Garden.'

This class, in Grade IV., we believe, solved, quite readily, questions in Stoddard's Mental Arithmetic selected by the Superintendent. One bright-eyed little girl at the head of the class, without the least hesitation, solved the following question: "How many chestnuts will pay for 9 walnuts, if 7 chestnuts are worth 10 2-7 walnuts?" We give the solution in the language employed by her:

10 1-7 walnuts equal 72-7 walnuts. If 72walnuts are worth 7 chestnuts, 1-70f a walnut is worth 1-72 of 7 chestnuts, which is the same as 7-72 of 7 one chestnut; and 7-7, which is one walnut, are worth 7 times 7-72, or 49-72 of a walnut, are worth 7 times 7-72, or 49-72 of a walnut, are worth 7 times 7-72, or 49-72 of a walnut, are worth 7 times 7-72, or 49-72 of a walnut, are worth 7 times 7-72, or 49-72 of a walnut for the purpose of walnut, are worth 7 times 7-72, or 49-72 of a walnut for the walnut for the purpose of walnut for the chestnut, and 9 walnuts are worth 9 times 49-72, which are 49 8, or 61/8 chestnuts.

THE ENGLISH AND HEBREW SCHOOL OF "ADATH ISRABL."-One afternoon last week we spent an hour and a half in the room of the lady who is Principal of the Female Department of this school. We heard classes in Reading, Arithmetic and English Grammar recite, and examined the copy-books of three cite, and examined the copy-books of three divisions of girls. Girls from eight to ten years of age performed, with ease and accuracy, examples given them ex tempore, involving large numbers and requiring a ready knowledge of the principles of the fundamental rules of Arithmetic. The rapidity of their operations was remakable, and their enthusiasm most intense. The first class in English Grammar parsed words and construed difficult sentences in Goodrich's Sixth Reader very correctly.

In reading, their articulation, emphasis, and Wood, R. H. Rousseau, and Messra Brown, Burbridge, Bryant and others of your city and flections were very commendable. At the choruses charmingly.

Although military interference is proven up in this case to a great extent, and great out-rages committed upon the people and the laws by the interference of the military authorities in the Second District, and great injustice and wrong upon Mr. McHenry, yet the committee think that Mr. Yeaman's majority of 5,000 over McHenry was so great that the interference did not reach and affect that many votes. Mr. McH. contends that there were between eight and nine thousand votes in the district that were not polled; that a sufficient number of this unpolled vote to have elected him was prevented from voting; that his friends were driven to the support of Mr. Yeaman through fear and intimidation; and that the whole election was a farce and humbur. ARRESTED FOR SELLING CLOTHING TO SOL-DIERS.-Yesterday M. A. Ansle, who keeps a clothing store on Market street, was arrested for selling officers' clothing to soldiers. He was taken before the Provost Marshal, who, after examining his case, sentenced Ansle to ten days' confinement in the military prison. There is a very stringent order in regard to the Belling of officers' clothing to private soldiers, and clothing dealers cannot be too particular as to whom they sell officers' clothing. Private soldiers, by obtaining officers clothing, have been able to impose upon not only our citizens, but also upon the military authorities, and we are requested to state that the order in regard to the selling of clothing to soldiers will be rigidly enforced.

Mr. Hend icks offered a resolution request-ng the Secretary of the Treasury to commu-licate what regulations have been made for the issue of certificates of cost, and whether they are payable in coin or currency, and if the latter, what amounts have been issued. Mr. Howard introduced a resolution, which was modified as follows, and adopted:

The committee say they can't satisfy themselves that there has been a seat of freedom of election, and to warrant the conclusion that Kitchen is the choice of the loyal voters of the district. A greater portion failed to participate in it for the reason that they were held under the power of the rebel army. Mr. Smith, of Kentucky, from the minori-

Mr, Whaley, of Western Virginia, contended that as people are taxed and furnished troops they should be represented here.

Mr. Dawes supperted the majority, mentioning as a fact that the Virginia district bordering on the Capital have been so far under the controll of the enemy since July, 1861, that it was impossible to hold elections there. was impossible to hold elections there. A Norwegian Dance.—Round the musician the young men and maidens formed a ring and began to dance. There was little talking, and that little was in an undertone. They went to work with the utmost gravity and decorum. Scarcely a laugh was heard—nothing approaching to a short during the whole approaching to a shout during the whole night; nevertheless, they enjoyed themselves thoroughly—I have no doubt whatever of that. The nature of their dance was somewhat incomprehensible. It seemed as if the chief object of the young men was to exhibit their agility by every species of impromptu bound and flug of which the human frame is capable, including the rather desperate feat of dashing themselves flat upon the ground. of dashing themselves not upon the ground.

The principal care of the girls seemed to be to

The principal care of the men and spid The principal care of the girls seemed to be to keep out of the way of the men and avoid being killed by a frantic kick or felled by a random blow. But the desperate features in each dance did not appear at first. Every man began by se zing his partner's hand, and dragging her around the circle—ever and anon twirling her around violently with one arm, and catching her around the waist with the other—in order, as it appeared to me, to save her from an untimely end. To this treatment the fair damsei submitted with pleased, though bashful, looks. But soon the men flung them off, and went in entirely on their though bashful, looks. But soen the men flung them off, and went in entirely on their own account; yet they kept up a sort of revolving course round their partners like satellites round their partners like satellites round their separate suns. Presently the satellites assumed some of the characteristics of the comet. They rushed about the circle in wild, erratic courses. They lead into the air, and while in that position stapped the soles of their feet with both hards. Should any one deem this an easy feat, let him try it. Then they became a little more sane, and a wal-z—or something like it—was got up. It was really pretty, and some of the movements were graceful; but the wild spirit of the glens re-entered the men rather suddenly. The females were expelled from the ring altogether, and the youths braced themselves for a little really heavy work. They flung and hurled themselves about like miniacs, stood on their heads, and walked on their hands—in short, became a company of acrobats—yet always kept up a sympathetic feeling for time with the music.

Vestorday seven-negroes, bearing respectively the names of Fowler Williams, Stephen Johnson, Joran Dorr, George Haves, Jacob Reid, Henry Scott, and Reuben Aifred, were put on trial before Judge Atocha, in the Provost Court, for a double murder committed on the 27th of January last, within a short distance of Port Hudson. The prisoners were all contrabands, or camp followers, who resided in the neighborhood of the fort, and who appear to have gone out together on a marsuding expedition. According to the testimony, the force numbered eight or ten, all armed with guns, pistols, and other weapons. About daylight in the morning a volley of musketry was discharged at the farm-house of Mr. Neff, which is just a mile and a half from the fort. This awakened the inmates, and a demand was made that all should come out at once and surrender. There appears to have been three men in the house, Mr. Neff, his son, and a stranger who was enjoying the hospitalities of the mansion for the night. The inmates held a consultation and got together such arms as they could find to use in their defense, determined to hold out as long the force of the mansion for the night. Scrofula and Scrofulous Affections, such as Tumors, Ulcers, Scres, Eruptions, Pimples, Pustules, Blotches, Boils, Blains, and all Skin Diseases. Oakland, Islan Diseases.

Oakland, Islan, 6th June, 1859

J. C. Avers & Co.—Genis: I feel it my duty to acknowledge what your Sarsaparilla has done for me. Having inherited a Scrofulous infection, I have suffered from it in various ways for; years. Sometimes it burst out in Ulcers on my hands and arms; sometimes it burst out in ward and distressed me at the stomach. Two years ago it broke out on my head and covered my scalp and ears with one sore, which was painful and loadbsome beyond description. I tried many medicines and several physicians, but without much relief from anything. In fact, the disorder grew worse. At length I was rejoiced to read in the Gospel Messenger that you had prepared an alterative (Sarsaparilla), for I knew from your reputation that anything you made must be good. I sent to read in the Gospel Messenger may you have your reputaalterative (Sarsaparilla), for I knew from your reputation that anything you made must be good. I sent to
Cincinnati and get it, and used it till it cured me. I took
it, as you aivise, in small doses of a teaspoonful over a
month, and used almost three bottics. New and healthy
skin soon began to form under the scab, which after a
while fell off. My skin is now clear, and I know by my
feelings that the disease has gone from my system. You
can well believe that I feel what I am saying when I tell
you, that I hold you to be one of the apostles of the age,
and remain ever gratefully

DR. J. C. AVER—Sir: I cheerfully comply with the request of your agent, and report to you some of the effects I have rea ized with your Sarsaparilla.

I have cured with it, in my practice, most of the complaints for which it is recommended, and have found it effects truly wonderful in the cure of Venered: one Mercuriate Disease. One of my patients had syphilitis ulcers in his throat, which were consuming his palarit and the top of his mouth. Your Sarsaparilla, steading taken, cured him in five weeks. Another was attacked by secondary symutoms in his nose, and the ulcerafic had caten away a considerable part of it, so that I be lieve the disorder would soon reach his brain and kill him. But it yielded to my administration of your Sarsa parilla; the ulcers healed, and he is well again, not of course without some disfiguration to his face. A won.an who had been treated for the same disorder by mercury was suffered exercicating pain in her joints and bones She, too, was cured entirely by your Sarsaparilla in a few weeks. I know from its formula, which your agent gave me, that this Freparation from your laboratory must be a great remedy; consequently, these truly remarkable results with it have not surprised me.

Fraternally yours, G. V. LARHMEE, M. D.
